

MINDFUL LEADERSHIP

Workshops 2025/26: October 16, 2025, 9:00-12:00
April 23, 2026, 9:00-12:00

THE BASEMENT OF BRAIN POWER

Homo Sapiens looks back to a fascinating evolutionary journey of more than 20k generations. The archaic programs we got in this journey are our basement for the everyday challenges we face in modern times. Instead of hunting, defending ourselves against wild animals or the weather we now hunt the next appointment or defend ourselves against the individual or business competitors.

Ideation and the imagination of the unknown is - as far as we know - a speciality of Homo Sapiens. Every human is equipped with a high performance processor between the ears. Called: The Brain. We guide you to an improved usage of its power.

MINDFULNESS

Mindfulness is a powerful tool for the positive energy of developing one's own ideas to success. Through mindfulness your Homo Sapiens team will improve its mental and physical health, sharpen its cognitive abilities and enforce its emotional resilience. Awareness of their own mindfulness will not only boost your professional success but also lead the team to a balanced, peaceful and fulfilling life.

LEADERSHIP

Everybody is a leader of her or his team and peers. And every leader is responsible for the balance of challenges of all team members. The brain and its fabulous ideation capability needs guidance through a mindful leader who is able to motivate the team, inspire their ideas and balance their challenges.

YOUR LECTURER IN THE WORKSHOP

LUDOVIT GARZIK

Managing Director of Innovationorbit providing executive education programs for innovation culture in Africa, Asia, Europe and the USA. Ludovit worked in Space Business, Research Promotion and from 2005 to 2024 he acted as Managing Director of the Austrian Council for Research and Technology Development.

Deep Dive into
Innovation Ecosystems:
